ANDREW SAMCHUK

FULL STACK DEVELOPER

LINKEDIN betelgeuse-as / EMAIL betelgeuse.as@gmail.com / WEB betelgeuseas.github.io/me-dev/

#PROFILE

I am a full stack developer from Ukraine with a passion for software development. I am proficient in both front-end and back-end development, creating user-friendly interfaces and powerful functionality. I strive to provide high-quality, innovative solutions. I try to keep up to date with the latest technologies to create scalable and efficient software.

#SKILLS

JavaScript (TypeScript)
React (Redux, Next)
Node (Express, Nest)
DB (MySQL, MongoDB)
API (Rest API, GraphQL, Postman)
Build (Webpack, Docker, Kubernetes)
Control (Jira, Git)

#LANGUAGES

English – Intermediate
Polish – Elementary
Ukrainian – Native

#EXPERIENCE

Wlaunch

February 2019 – August 2019

Full Stack Developer
Development of an application that facilitates the introduction of your own business. Development was carried out with the help of Angular and auxiliary libraries. Different approaches to application development were used, but mostly it was a declarative approach to development. In parallel, API was developed and improve on the Node using Express. Combination of Front-end (Angular, Twig, Sass) part and Back-end (Node, Express) part within one application.

Silkway Solutions

August 2019 – November 2021

Full Stack Developer
In parallel, the development of an online store with the help of X-Cart and the development of an application that allows you to manage an online store with Magento. We used only Object-Oriented Programming. Develop synchronization of these two projects using cloud technology and write your own commands. Front-end development was done with HTML, Twig, Sass, JavaScript, and Back-end with PHP, MySQL, Magento.

MWDN

November 2021 - Now

Full Stack Developer
Development of internal applications using pure JavaScript, React and Redux, Node and Express, MongoDB. Development of browser extensions, development using JavaScript, TypeScript, React, Material UI, Bootstrap technologies. In addition to extensions, we developed an admin page for creating extensions and APIs for them using Node.js, Express with MySQL.

#EDUCATION

Khmelnitsky National University
2015 – 2019

Computer engineering.
Bachelor's degree in the Faculty of Programming, Computer, and Telecommunication Systems.

Web System Solution
December 2018 – January 2019

Practice React.
Development of an application with the help of React and Redux. The focus was mainly on Functional Programming with its basic principles. The development was part of the Front-end part with the use of various libraries that helped speed up the development. Preference was given to gaining the skills to link the React application to the Redux store.

Elogic Commerce
November 2020 – February 2021

Practice Magento2.
Learn and Development of an online store on Magento2. Learn the principles and rules by which Magento can effectively develop or improve applications. Object-Oriented Programming allowed to better structure the components and their further use.
